

$\triangle Q'R'S'$ was created by dilating $\triangle QRS$. The length of $\overline{QR}$ is 3 and the length of $\overline{Q'R'}$ is 9.

- $\triangle QRS$ is the

, and the center of dilation is point

☐ P
☐ Q
☐ Q'

.
- Determine the dilation ratio.
- If the length of $\overline{Q'S'}$ is $3\sqrt{5}$, determine the length of $\overline{QS}$.
- What is the ratio of $\frac{RS}{R'S'}$?
- What is the ratio of $\frac{P'R'}{PR}$?

$WXYZ$ and $HIJK$ are shown on the coordinate grid, where $WXYZ$ is a dilation of $HIJK$.

6. Complete the table.

Segment	Slope	Distance
$\overline{YZ}$		
$\overline{JK}$		
$\overline{WX}$		
$\overline{HI}$		

7. Show the dilation on the coordinate grid by drawing dotted lines from the center of dilation through each vertex.
8. Write a description of the dilation by giving the center of dilation and the scale factor.
9. What is the ratio $\frac{OX}{OI}$?
10. What is the ratio $\frac{OY}{OJ}$?
