

Geometry: Unit 6, Lesson 4

1. $KMXR$ is a rotation of $GLDS$ 180° clockwise about the origin. What is the algebraic description that represents this transformation?

2. $\triangle A'B'C'$ is the result of a transformation of $\triangle ABC$. What is the transformation that maps $\triangle ABC$ onto $\triangle A'B'C'$?

3. The diagram shows four different transformations of $\triangle KBC$. What is $\triangle RST$ in relation to $\triangle KBC$?
