

6.7.4 Activity

Description A

Draw two triangles where both have one angle that measures 45° .

Description B

Draw two triangles where both have one angle that measures 45° and another angle that measures 30° .

Description C

Draw two triangles where both have angles whose measures are 45° and 30° , and the lengths of a pair of corresponding sides are 2 cm and 6 cm.

Description D

Draw two triangles where the lengths of corresponding sides are 1.5 cm and 3 cm, 2.5 cm and 5 cm, and 3 cm and 6 cm.

Description E

Draw two triangles where the lengths of corresponding sides are 1.5 cm and 4.5 cm, 2 cm and 5 cm, and 2.5 cm and 5.5 cm.

Description F

Draw two triangles where the lengths of corresponding sides are 2 cm and 6 cm and 1 cm and 3 cm, and their included angle is 60° .

Description G

Draw two triangles where both have one angle that measures 45° , one angle that measures 30° , and another angle that measures 105° .
