

Geometry: Unit 6, Lesson 8

1. Line segments WB , TF , NC , and ZL are shown. $\angle NGM \cong \angle DSG$. Based on the given information, what is a statement that can be proved?

2. Triangles XYW and VWZ are shown. $\overline{XY} \parallel \overline{ZV}$. What is the relationship between $\angle ZXY$ and $\angle VZW$?

3. Triangles MWP and SRP are shown. Why is $\angle MPW \cong \angle SPR$?
