

Geometry: Unit 6, Lesson 12

1. Solve the equation $4.25x - 4 = 7.35x - 10.82$ for x .

2. An image of two similar trapezoids is shown where $VMSH \sim BYTW$. The scale factor from $BYTW$ to $VMSH$ is $\frac{2}{5}$ and $MV = 8$. What is the value of YB ?

3. Rectangles $KTNP$ and $WXYZ$ are shown. $KTNP$ is dilated by a scale factor of 3 to create $WXYZ$. $KT = 4x + 2$. What is an expression that can be used to represent the length of $\overline{WX}$?
