

## Geometry: Unit 6, Lesson 13

1. Triangles  $CMH$  and  $RDT$  are shown where  $CMH \sim TDR$ . Given that  $HM = 8$ ,  $RD = 3x + 1$ , and the scale factor from  $CMH$  to  $TDR$  is 2, solve for  $x$ .

2. A diagram of a triangular garden is represented. If  $x = 3$ , what is the perimeter of  $\triangle WBX$ ?

3. Triangles  $KWN$  and  $SRT$  are shown where  $\triangle KWN \sim \triangle RST$ .  $KN = 5.1$ ,  $NW = x$ ,  $ST = 8$ , and  $RT = 10.2$ . What is the value of  $x$ ?
