

1. _____ circles are similar.

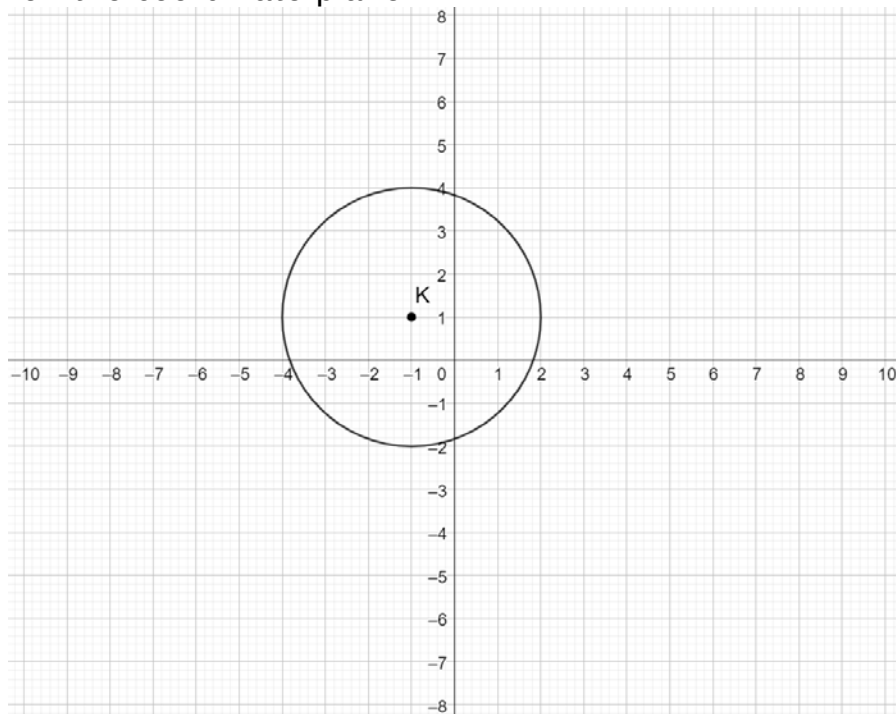

All
Some
No

Given Circle M as the preimage:

2. How can Circle M be mapped onto Circle R ?
3. How can Circle M be mapped onto Circle Q ?
4. How can Circle M be mapped onto Circle T ?
5. How can Circle M be mapped onto Circle W ?

Circle K is shown on the coordinate plane.

6. Draw Circle J , the result of translation 3 units right and 4 units down and a dilation of $\frac{2}{3}$ about the center of Circle K .
7. Draw Circle L , the result of translation 2 units left and 3 units up.
8. Draw Circle M , the result of a dilation of $\frac{5}{3}$ about the center of Circle K and a translation 3 units down.
9. Draw Circle P , the result of translation 6 units right and 2 units up and a dilation of $\frac{1}{3}$ about the center of Circle K .
10. Draw Circle R , the result of translation 3 units left and a dilation of 2 about the center of Circle K .
