

Geometry Unit 7 Honors Assessment Guide

General Information	The two honors benchmarks in Unit 7 are assessed on this assessment. Teachers may choose to give this as a quiz after the honors lessons are covered. Teachers may also choose to use it in conjunction with the assessment that covers lessons 1-9. The assessment requires the student to show the set-up of their work. Since applying the laws and formula taught in the honors lessons will require the student to use a calculator, student understanding of the law or formula can be determined from the set-up the student uses before entering the information into the calculator. Teachers are encouraged to evaluate student understanding using both their set-up and the correct answer.
Calculator Information	The questions on the assessment are calculator.
Total Recommended Points	The total recommended points in this guide are 48 points.

Question		1	Benchmark(s)	MA.912.T.1.3
			Recommended Scoring (16 Total Points)	Consider giving 4 points for the correct set-up and 4 points for the correct angle for each answer.
Angle	Work	Measurement		
$\angle B$		86°		
$\angle T$		42.3°		

Question		2		Benchmark(s)	MA.912.T.1.3									
<table><tr><th>Side</th><th>Work</th><th>Measurement</th></tr><tr><td>$\overline{HT}$</td><td></td><td>23.709</td></tr><tr><td>$\overline{HW}$</td><td></td><td>20.282</td></tr></table>				Side	Work	Measurement	$\overline{HT}$		23.709	$\overline{HW}$		20.282	Recommended Scoring (16 Total Points)	Consider giving 4 points for the correct set-up and 4 points for the correct side length for each answer.
Side	Work	Measurement												
$\overline{HT}$		23.709												
$\overline{HW}$		20.282												
Question		3		Benchmark(s)	MA.912.T.1.4									
2240.157				Recommended Scoring (8 Total Points)	Consider giving 4 points for the correct set-up and 4 points for the correct area.									
Question		4		Benchmark(s)	MA.912.T.1.3									
29.1°				Recommended Scoring (8 Total Points)	Consider giving 4 points for the correct set-up and 4 points for the correct angle measure.
