

Geometry: Unit 7, Lesson 2

1. $\triangle TRY$ with altitude $\overline{RF}$ is shown. If $m\angle T = 33^\circ$, then what is $m\angle TRF$?

2. $\triangle TKP$ where $m\angle TKP = 90^\circ$ is shown. What is the hypotenuse?

3. $\triangle FVR$ where $m\angle FRV = 90^\circ$ is shown. What are the legs of $\triangle FVR$?
