

Geometry: Unit 7, Lesson 4

1. $\triangle WPH$ and $\triangle YPR$ shown are right triangles. What angle do $\triangle WPH$ and $\triangle YPR$ have in common.

2. Right triangle $\triangle RKP$ is shown on the coordinate plane where $m\angle KRP = 90^\circ$ and $m\angle KPR = 26^\circ$. What is the $m\angle RKP$?

3. Right triangle $\triangle CRM$ is shown on the coordinate plane. What is the ratio of the cosine of $\angle C$?
