

Geometry: Unit 7, Lesson 9

1. A man sees a boat in the water, at point K , from the top window of the lighthouse, at point H . The height of the lighthouse window is 20 meters above the water. The boat is 30 meters away from the base of the lighthouse, G . How far away is the person from the boat?

2. The crane shown has two arms to lift heavy objects. One arm of the crane, $\overline{RS}$, has a length of 15 meters. The crane's arm makes a 56° angle with the ground. What equation can be used to find the length of $\overline{RN}$?

3. Lines H , B , F , and D are shown on the coordinate grid. Which of the lines has a zero slope?
