

Geometry: Unit 7, Lesson H1

1. What is the formula to find the sine ratio of a reference angle?

2. Right triangle THM is shown where $m\angle MTH = 90^\circ$, $TH = 10$ and $MH = 16$. What is the length of $\overline{TM}$, rounded to the nearest hundredth?

3. $\triangle PBK$ is shown where $\overline{PB} = 20$, $\overline{BK} = 21$, $\overline{PK} = 29$, and $m\angle B = 90^\circ$. What is an equation that can be used to find the $m\angle K$?
