

Geometry: Unit 8, Lesson 2

1. $\triangle GWT$ where $m\angle TGW = 64^\circ$ and $m\angle GWT = 50^\circ$ is shown. What is the measure of $\angle GTW$?

2. Lines KN , TP , RW , and YM where $\overleftrightarrow{RW} \parallel \overleftrightarrow{YM}$ and $\overleftrightarrow{KN} \parallel \overleftrightarrow{TP}$ are shown. $m\angle FHS = (7x + 14)^\circ$, $m\angle GSH = (3x + 6)^\circ$, and $m\angle FGS = (9x - 18)^\circ$. What is an equation that can be used to find the value of x ?

3. Right Triangle HNG where $m\angle NHG = 22^\circ$, $m\angle NGH = 90^\circ$, and $m\angle GNH = (4x)^\circ$ is shown. What is the value of x ?
