Lesson 1 Practice

Name _____
Date _____
Period _____

Use the given context to answer questions 1-10.

Eduardo orders a small circular pizza that has a 10-inch (in.) diameter and is cut into 6 triangular slices.

1. What is the approximate area of a 10-inch pizza? Use 3.14 for π .
2. If the slices are cut precisely and equally, what fraction and percentage of the pizza is 3 slices?
3. What is the area of 3 slices?
4. What is the central angle of 3 slices?
5. If the slices are cut precisely and equally, what fraction of the pizza is 5 slices?

6. What is the area of 5 slices?
7. What is the central angle of 5 slices?
8. If the slices are cut precisely and equally, what fraction of the pizza is 1 slice?
9. What is the area of 1 slice?
10. What is the central angle of 1 slice?
