

Geometry: Unit 10, Lesson 5

1. Circle P is shown, where points M , K , R , and H are on the circle. What arc is intercepted by $\angle RPK$?

2. What is the value of the expression $(17y - 13) - (11y + 3)$ if $y = 8$?

3. Circle G is shown, where points R , V , and W lie on the circle, $m\widehat{RV} = 166^\circ$, $m\widehat{WV} = x^\circ$, and $\angle RGV = 81^\circ$. What equation can be used to find the value of x ?
