

Geometry
Unit 11
Lesson 4 Practice

Name _____
Date _____
Period _____

Circle M is shown, with $ABCD$ inscribed in the circle. $m\angle ABC = 96^\circ$, and $m\angle BCD = 125^\circ$.

1. Find the $m\angle ADC$.
2. Find the $m\angle DAB$.
3. Find the $m\widehat{ABC}$.

Circle V is shown, with $RSTW$ inscribed in the circle. The $m\angle RWT = 140^\circ$, $m\angle WRS = (5x)^\circ$ and $m\angle RST = (2x + 6)^\circ$.

4. Find the value of x .
5. Find the $m\widehat{WTS}$.

Circle B is shown, with $GHJK$ inscribed in the circle. $m\angle GHJ = (3x + 50)^\circ$, $m\angle HJK = (4x)^\circ$ and $m\angle GKJ = (4x - 10)^\circ$.

6. Find the value of x .

7. Find $m\angle KJH$.

8. Find $m\angle GKJ$.

9. Find $m\angle HGK$.

10. Find $m\angle JHG$.
