

Geometry: Unit 11, Lesson 4

1. Circle C with points H , R , and T on the circle is shown. What is equal to the measure of $\widehat{HR}$?

2. Circle P with points R , K , and L on the circle is shown, where $\overline{RK}$ is a diameter. What is $m\angle RLK$?

3. Quadrilateral $VRST$ is shown inscribed in circle P . What is $m\angle RVT + m\angle RST$?
