

Geometry: Unit 11, Lesson 8

1. Parallel lines KM and TN are shown, with transversal line GR . Why is $\angle KHG \cong \angle TFH$?

2. Triangle MTR is shown, where point X is the midpoint of $\overline{MT}$, and point Y is the midpoint of $\overline{TR}$. Is the statement $\frac{TY}{TR} = 2$ true?

3. What theorems can be used to prove triangle similarity?
