

Geometry: Unit 12, Lesson 1

1. Circle H is shown with point V, S, K , and T on the circle and points G and W outside the circle. Give two angles that measure 90°

2. Circle C is shown with points T, M, B, N , and W on the circle, points R and S outside the circle, and point X inside the circle. What Segment is the longest chord shown on circle C ? Give a segment that is the radius of circle C . Give an angle that measures 90° .

3. Circle N is shown with points C, S, B , and L on the circle and points R and H outside the circle. What is the tangent of the circle? Give an angle that measures 90° .
