

Geometry: Unit 12, Lesson 2

1. Point R is on line segment XY . Given $XR = 7$ and $XY = 22$, determine the length of $\overline{RY}$.

2. Point P is on line segment ST . Given $SP = 9$ and $PT = 8$, determine the length of $\overline{ST}$.

3. Circle C is shown with points G, H, F , and N on the circle and points R, P , and K outside the circle. Give an example of a secant of circle C ?
