

Geometry: Unit 12, Lesson 4

1. Segments GR and PM are equal in length. $GR = (3x + 29)$ $PM = (7x - 19)$. What is the value of x ?
2. Given the equation $14x + 6 = 13$, find the value of x .
3. Segments MN and AB are equal in length. $MN = (5x - 10)$ and $AB = (2x + 23)$. What is the value of x ?
