

Geometry: Unit 12, Lesson 6

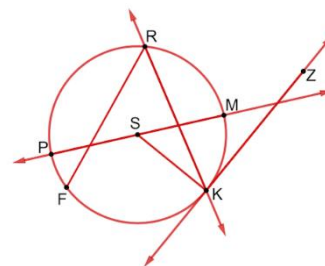

1. An equation is shown $(a)(a + 9) = 10^2$. What are the solutions to the equation?

2. Circle W is shown with points L, H, D , and N on the circle and point Y outside the circle. Complete the table by identifying the type of line or segment.

Line or Segment	Type
$\overleftrightarrow{YH}$	
$\overline{WH}$	
$\overline{LD}$	
$\overleftrightarrow{LH}$	

3. Circle S is shown with points R, M, K, F , and P on the circle and point Z outside the circle. Complete the table by identifying the type of line segment.

Line or Segment	Type
$\overleftrightarrow{RK}$	
$\overleftrightarrow{KZ}$	
$\overline{PM}$	
$\overline{RK}$
