

For questions 1 and 2, consider the equation of the circle represented by $(x + 3)^2 + (y + 4)^2 = 9^2$.

1. Rewrite the equation in general form.

2. Give the key features of the circle.

Center	Diameter	Radius
Domain	Range	

For questions 3 and 4, consider the equation of the circle represented by $(x - 5)^2 + (y + 2)^2 = 5^2$.

3. Rewrite the equation in general form.

4. Give the key features of the circle.

Center	Diameter	Radius
Domain	Range	

For questions 5 and 6, consider the equation of the circle represented by $x^2 + y^2 - 2x - 6y = -6$.

5. Rewrite the equation in center-radius form.

6. Give the key features of the circle.

Center	Diameter	Radius
Domain	Range	

For questions 7 and 8, consider the equation of the circle represented by $x^2 + y^2 - 20y = 21$.

7. Rewrite the equation in center-radius form.

8. Give the key features of the circle.

Center	Diameter	Radius
Domain	Range	

For questions 9 and 10, consider the equation of the circle represented by $x^2 + y^2 - 10x = -24$.

9. Rewrite the equation in center-radius form.

10. Give the key features of the circle.

Center	Diameter	Radius
Domain	Range
