

Geometry: Unit 13, Lesson 5

1. Directed line segment $\overline{RM}$ is shown, where points S , W , Y , and T are on the segment. What point divides directed line segment $\overline{RM}$ into a 3 : 7 ratio?

2. What is the value of the expression $\left(\frac{5}{2}\right)2 + \left(\frac{1}{2}\right)7$?

3. Line segment $\overline{TY}$ is shown, where points S and W are on the segment. Is the ratio of $TS : TY$ the same as the ratio of $SY : TY$?
