Lesson 7 Practice

Name _____
Date _____
Period _____

Use the following information for questions 1-4. $\triangle ABC$ has vertices at $A(-7,1)$, $B(0,-1)$, and $C(-6,-5)$.

1. What is the average of the x -coordinates? Round to the nearest thousandth if necessary.
2. What is the average of the y -coordinates? Round to the nearest thousandth if necessary.
3. What are the coordinates of the centroid?
4. Verify the coordinates of the centroid by drawing the median of each side.

$\triangle CDE$ has vertices at $C(-3,4)$, $D(3,4)$, and $E(0,9)$.

5. What is the average of the x -coordinates? Round to the nearest thousandth if necessary.
6. What is the average of the y -coordinates? Round to the nearest thousandth if necessary.
7. What are the coordinates of the centroid of $\triangle CDE$?
8. Verify the coordinates of the centroid by drawing the median of each side.

$\triangle NPQ$ has vertices at $N(8,3)$, $P(9,-3)$, and a centroid at $(\frac{10}{3}, \frac{4}{3})$.

9. Graph $\triangle NPQ$ on the coordinate plane.

10. What are the coordinates of vertex Q ?
